

Git HandsOn - 5

Aim:

To clean up the local Git repository, synchronize it with the remote repository, and push local changes to GitHub.

Objectives:

- Verify the repository status.
- List all local and remote branches.
- Pull the latest changes from GitHub.
- Commit pending changes.
- Push the updated repository to GitHub.
- Verify changes in the remote repository.

Commands Used:

```
git status
git branch
git branch -a
git pull origin main
git add .
git commit -m "Completed Git cleanup and synchronization"
git push origin main
```

Outputs:

MINGW64:/c/Users/HP/Desktop/GitDemo

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git push origin master
Enumerating objects: 14, done.
Counting objects: 100% (14/14), done.
Delta compression using up to 16 threads
Compressing objects: 100% (9/9), done.
Writing objects: 100% (12/12), 1.19 KiB | 134.00 KiB/s, done.

   e3c17da..a8ac4f6  master -> master
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git status
On branch master
Your branch is up to date with 'origin/master'.

nothing to commit, working tree clean
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git branch
* master
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git branch -a
* master
  remotes/origin/master
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git pull origin master
From https://github.com/GayathriVanga/GitDemo
   * branch      master      -> FETCH_HEAD
Already up to date.
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git status
On branch master
Your branch is up to date with 'origin/master'.

nothing to commit, working tree clean
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git add .
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git commit -m "Completed Git Cleanup and Synchronization"
On branch master
Your branch is up to date with 'origin/master'.

nothing to commit, working tree clean
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$ git push origin master
Everything up-to-date
```

```
HP@LAPTOP-JQJ9603M MINGW64 ~/Desktop/GitDemo (master)
$
```

The screenshot shows a web browser displaying the GitHub repository page for 'GayathriVanga/GitDemo'. The browser's address bar shows the URL 'github.com/GayathriVanga/GitDemo/tree/master'. The repository page includes a header with the repository name, a search bar, and navigation links like 'Code', 'Issues', 'Pull requests', 'Agents', 'Actions', 'Projects', 'Wiki', 'Security and quality', 'Insights', and 'Settings'. Below the header, there's a section for the repository's status, showing 'master' branch, '1 Branch', and '0 Tags'. A table of recent commits is visible, with the latest commit by 'a8ac4f6' 12 minutes ago, titled 'Added backup files to gitignore'. The commit details show files like '.gitignore', 'branch.txt', 'hello.xml', and 'welcome.txt'. Below the commits, there's a section for the README, with a prompt to 'Add a README'. On the right side, there's a sidebar with 'About' (no description), 'Activity' (0 stars, 0 watching, 0 forks), 'Releases' (no releases published), 'Packages' (no packages published), and 'Contributors' (1 contributor: GayathriVanga).

Result:

Successfully verified the repository status, synchronized the local repository with GitHub, committed any pending changes, pushed the latest updates to the remote repository, and confirmed that the changes were reflected on GitHub.
