

Lab: Clean Up and Push Back to Remote Git

Objective

- Understand how to clean up and push changes to a remote Git repository.

Commands

1. Verify whether master is in a clean state.

```
$ git status
```

2. List all available branches.

```
$ git branch -a
```

3. Pull the remote repository to the master branch

```
$ git checkout master  
$ git pull origin master
```

4. Push the pending changes from "Git-T03-HOL_002" to the remote repository.

```
$ git push origin master
```

5. Verify that the changes are reflected in the remote repository.

```
$ git log --oneline --graph --decorate
```
